

Product Specification Sheet

MSQ-9

Product Description

A durable, stretch performance shirt engineered for demanding professional environments. The rip-stop construction improves resistance to tears and damage, while the combination of polyester, cotton and spandex delivers durability, breathability, comfort and freedom of movement.

Material Specifications

Specification	Details
Main Fabric	65% Polyester / 32% Cotton / 3% Spandex
Secondary Material	100% Polyester
Fabric Weight	235 g/m ²
Fabric Construction	Rip-stop
Stretch	Elastic construction with stretch and recovery
Fabric Width	150 ± 2 cm
Certification	OEKO-TEX® STANDARD 100, Product Class II

The main fabric uses a rip-stop weave and incorporates 3% spandex to provide elasticity and recovery with movement.

Key Characteristics

Rip-Stop Durability

The rip-stop construction is designed to improve resistance to tearing, fraying and ripping.

Elbow/Shoulder pads

Vapor-flow mesh technology ensures maximum thermal dissipation meanwhile providing maximum protection and comfort.

Multifunctional Pockets

High-capacity tactical pocket with integrated pen holder.

Tactical flexibility

Flexible elastic components positioned around the elbows and wrists to ensure maximum mobility and comfort.

Performance Benefits

- **Enhanced tear and rip resistance** through rip-stop construction
 - **Improved freedom of movement** through stretch properties
 - **Durable construction** for demanding and intensive use
 - **Breathable and comfortable** due to the cotton content
 - **Quick-drying performance** supported by polyester fibres
 - **Elastic recovery** to help maintain comfort during movement
 - **OEKO-TEX® STANDARD 100 certified main fabric**
-
